FOREWORD

This is the report of the fifth annual National Prison Census. It was conducted on the night of 30 June 1986 and included all persons, convicted and unconvicted, held in adult correctional institutions in all Australian jurisdictions.

The tables contained in this report are largely compatible with those in the reports of the Censuses of 1982 to 1985 as, wherever possible, the same definitions, counting rules and tabulations have been used. The data collection form used in 1986 differed from that used for 1985 only in the inclusion of a question on the important topic of alcohol/drug involvement in offences for which people are in prison, and the dropping of the question on outstanding charges which had proven to be somewhat unsatisfactory.

Once again the data collection exercise was co-ordinated by the National Correctional Statistics Committee, the body which is accountable to the Annual Conference of Correctional Ministers for this and a number of other projects. Membership of this committee varies from time to time. In addition to the representatives of the Institute and the Australian Bureau of Statistics, key contributors this year have been:

Don Porritt and Simon Eyland (New South Wales)
Monika Henderson, Stuart Ross and Lynne Wilkinson (Victoria)
Peter Roylance (Queensland)
Kevin Coombes (Western Australia)
Frank Morgan (South Australia)
Bill Harvey (Tasmania)
Allan van Zyl (Northern Territory)
Daryl Kidd (Australian Capital Territory)

We express our sincere appreciation to our fellow committee members for their co-operation and willingness to negotiate complex issues. Our thanks are also due to the numerous unnamed workers in Australian corrections departments who collected and collated the basic data.

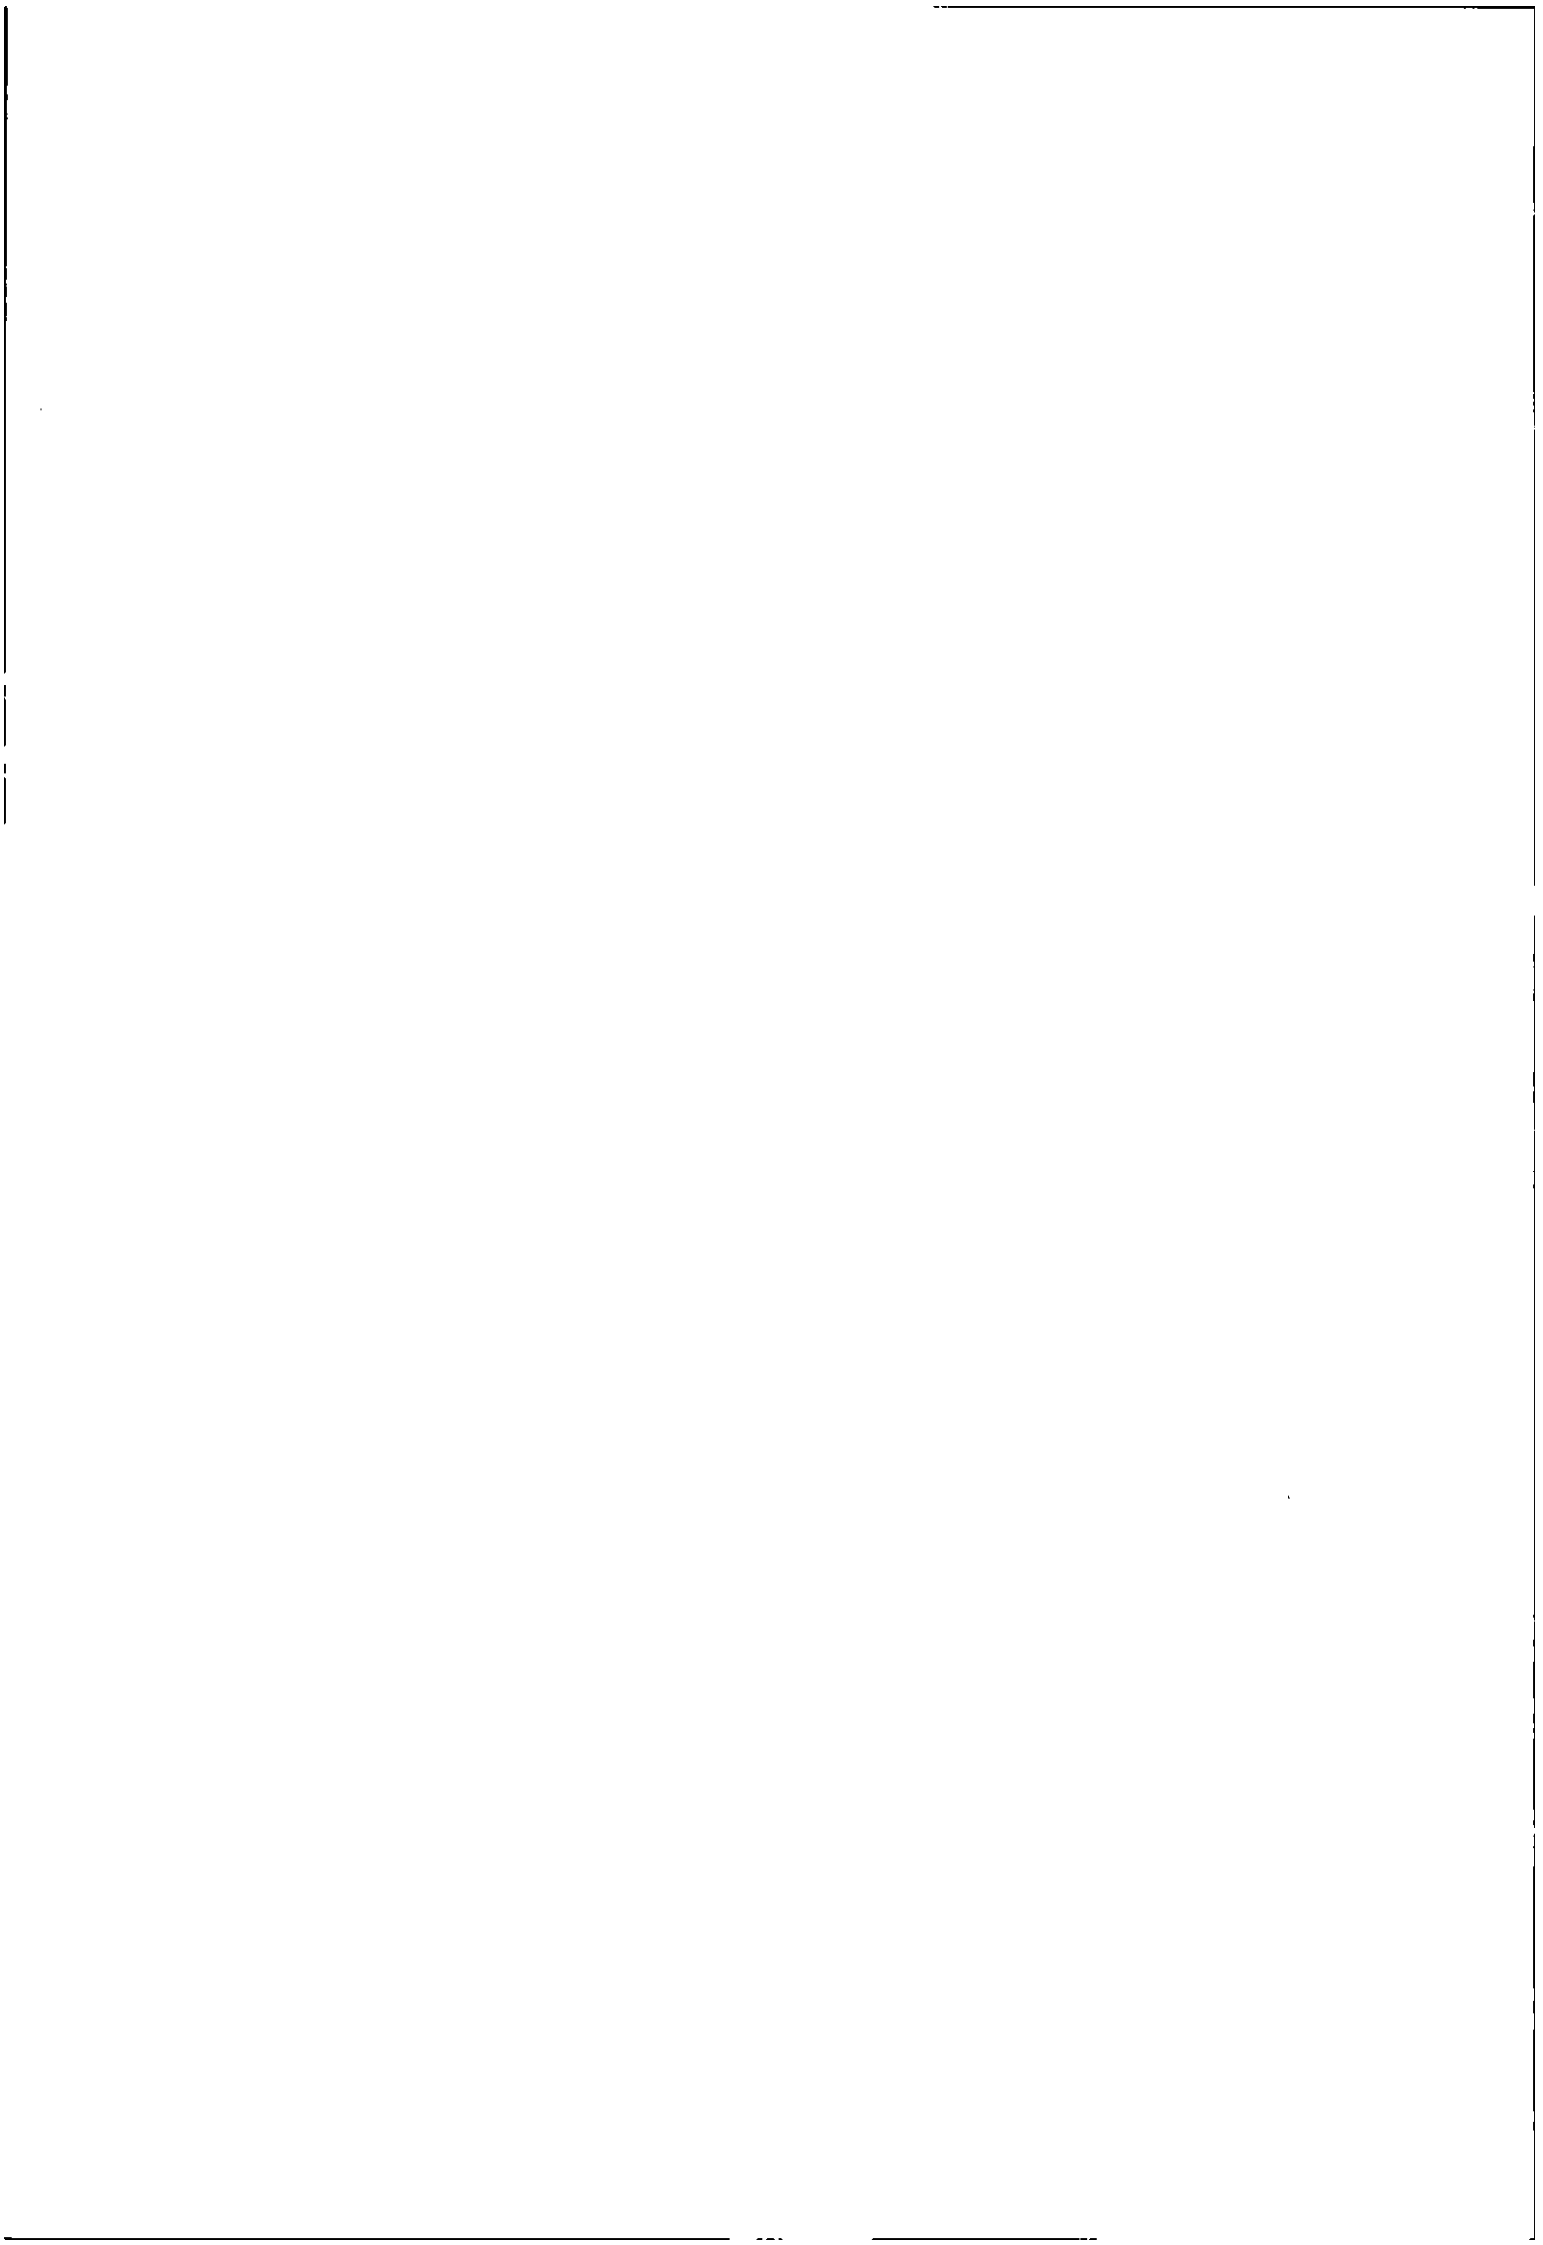

We are also grateful to Dianne Dagger and Anita Scandla of the Australian Institute of Criminology for their work in the preparation of this publication and to the staff of the Australian Bureau of Statistics for their advice and encouragement.

EXPLANATORY NOTES

The information collected in the census was of three basic types:

- I General Information on the demographic and social characteristics of the prisoners;
- II Information on the legal status of the prisoners, including the nature of the offence(s) or charge(s) for which the person is in prison
- III For prisoners actually serving a sentence, details of the sentence(s) being served.

The design of the basic data collection form (see Appendix 1) reflected these three areas. The selection and formulation of the items on the data-collection form was largely determined by the potential value of the information, but was to some degree affected by the ability of some jurisdictions to obtain the information, and the difficulty involved in achieving compatibility between responses. The results have been tabulated in such a way as to maximise, wherever possible, compatibility with other sources of data - in particular the five-yearly censuses of population and housing conducted by the Australian Bureau of Statistics, the various publications on crime and justice issues from the state offices of the ABS, and those of the corrections departments themselves.

Most of the variables presented in this report are self explanatory. However, as with any collection of statistics covering a range of jurisdictions there have been problems of definition, where data from one jurisdiction cannot be directly equated with the equivalent item from another jurisdiction, either because of different legislation, or different administrative recording practices. While efforts have been made to attain maximum comparability between jurisdictions, some differences remain. These differences, together with some points of definition, are outlined below.

Note that where statistics have been rounded, such as in the presentation of percentage totals, any discrepancies between sums of the component items and totals are due to rounding.

1. Date and Coverage of the Census

The census related to all persons on remand or serving sentences at any gazetted prison for adult offenders, operated or administered by State/Territory correctional agencies, at midnight on 30 June 1986, and included persons temporarily absent from such establishments (e.g. prisoners in hospitals, on various forms of leave, away on work release or persons serving periods of periodic detention) except for persons on pre-discharge leave in Victoria. Weekend detainees (in New South Wales and Queensland) who were in custody the weekend prior to the census date were counted. Institutions for juvenile offenders were specifically excluded from the census. Persons held in the Wacol Security Patients' Hospital in Queensland, some of whom are technically under the control of the correctional authority, are included. A map showing the locations of all institutions covered by the Census is included as Figure 1.

2. Sources of Information

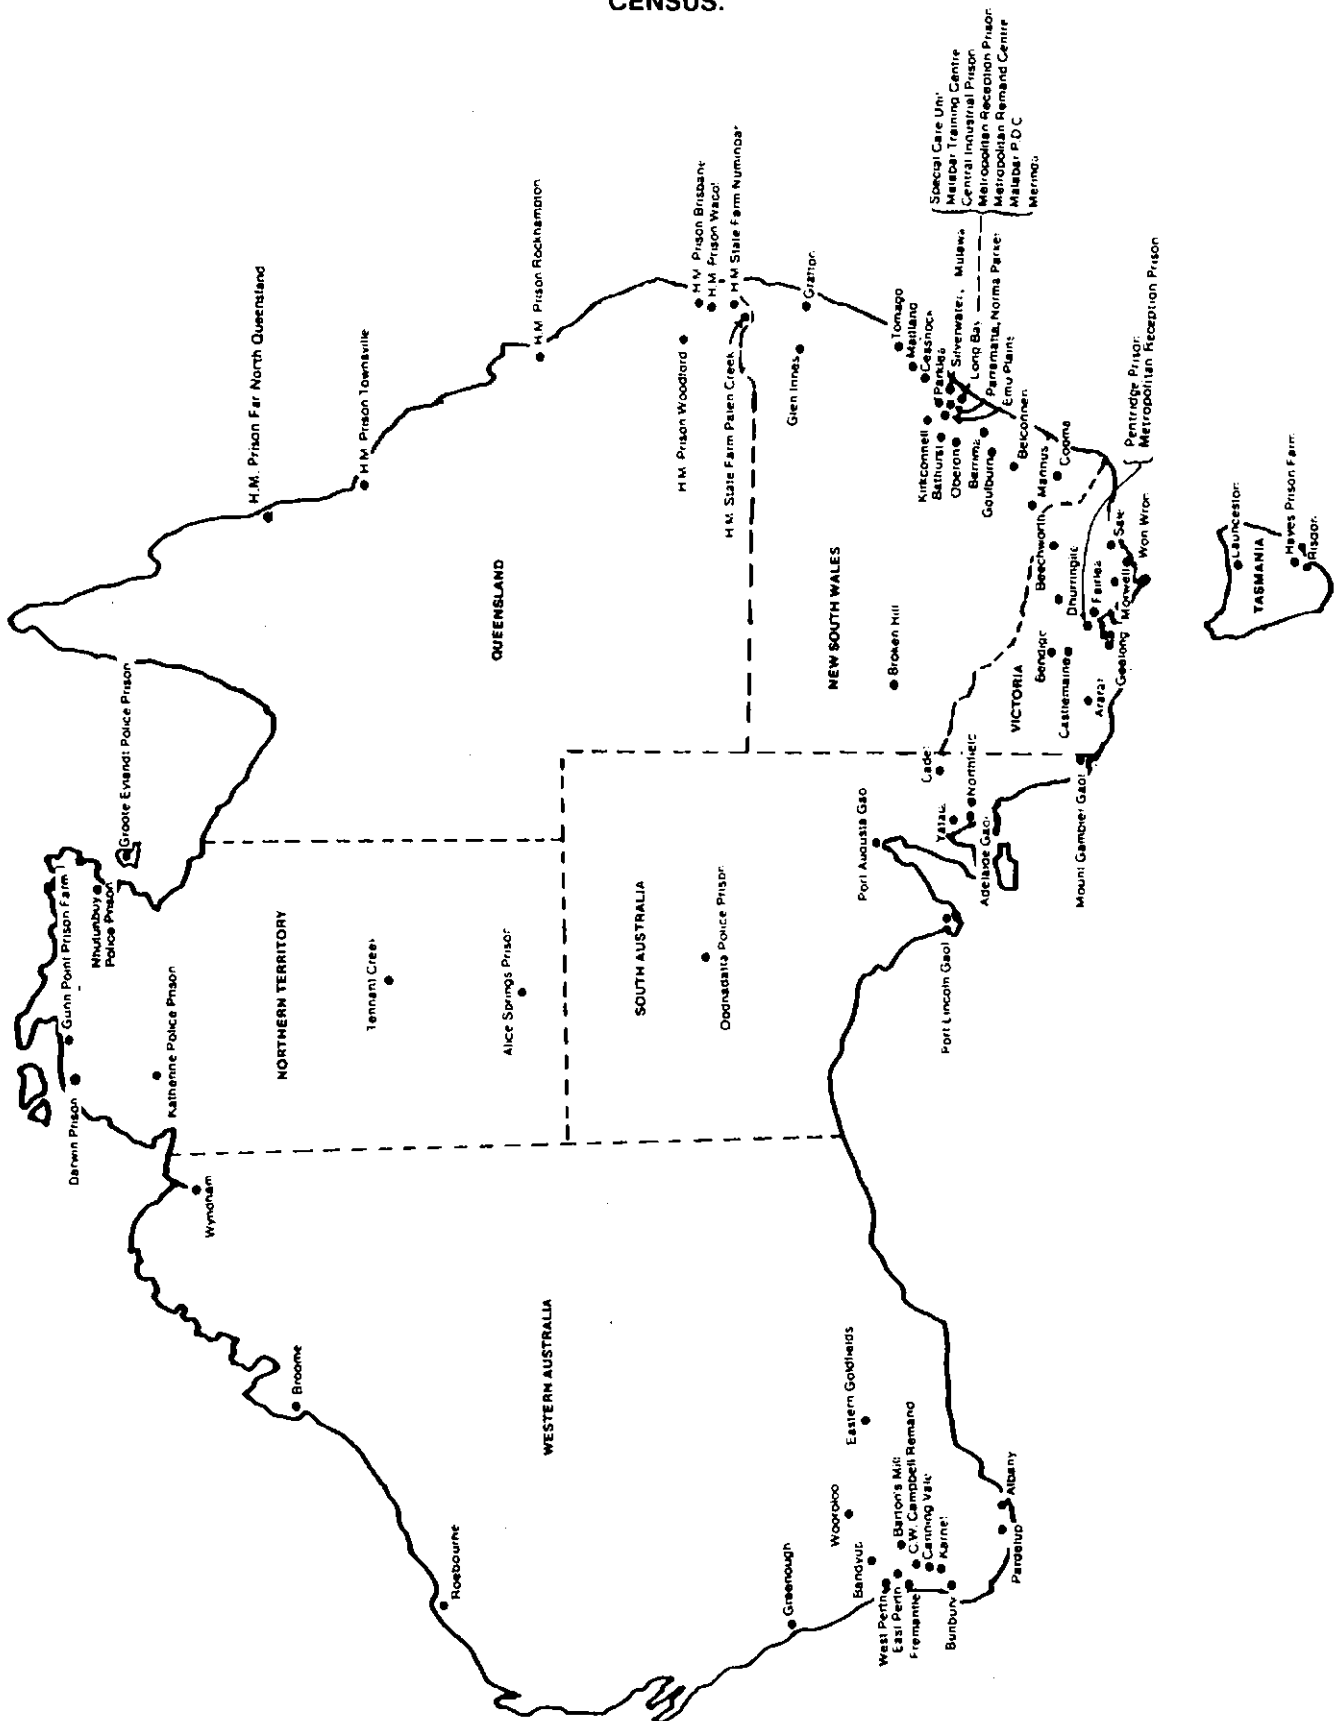

Most of the information for the census was obtained from existing records, which in some jurisdictions were computerised. Information not on record was, where feasible, collected specifically for the census by individual interview of prisoners. Where reliable information was not available, for example sentence and parole details for sentenced prisoners recently taken into custody, it was recorded as not known. In several jurisdictions, modified data collection forms were used, and prison staff were asked to 'write in' answers in complex areas such as the determination of most serious offences, aggregate sentence and earliest date of release; their answers were then coded into the standard form by head office personnel, thereby ensuring a high level of reliability in these areas. Several jurisdictions were again involved in computerisation during the year, and this may have resulted in deliberate or unintentional changes of definitions and methods of determining the appropriate responses to difficult questions such as 'most serious offence' or 'legal status' in complex cases.

3. Jurisdiction of Custody

All prisoners included in the census were recorded according to the jurisdiction in which they were in custody regardless of the jurisdiction that imposed the sentence. Thus A.C.T. prisoners serving sentences in New South Wales are included in the N.S.W. figures. For this reason the statistics presented in this report are not directly comparable with the statistics given in the Australian Institute of Criminology monthly publication, Australian Prison Trends. This year, however, for the first time a Table has been included showing the numbers and percentages serving sentences in one jurisdiction which were imposed in another. (see Explanatory Note 14)

4. Age of Prisoner

The date of birth of the prisoner was used to calculate the prisoner's age at census date. This was regarded as a more appropriate measure in the context of prisoner stock statistics than age at receipt. The tabulations of this variable therefore show the age-structure of the prison populations as at 30 June 1986. The age at which persons normally become liable to imprisonment in an adult prison varies from State to State, being seventeen years in Victoria, Queensland, Tasmania and Northern Territory, and eighteen years in the other jurisdictions although younger persons who have been convicted of a particularly serious offence may also be sent to adult prisons. Persons in juvenile institutions were specifically excluded from this census.

5. Aboriginality

Where the information was obtained by interview the prisoners were asked to state the racial origin group to which they considered themselves to belong. Information obtained from prison records was recorded 'as stated' in those records. The method of determining Aboriginality for prison record purposes may not necessarily be consistent between, or even within, jurisdictions. These data for Queensland prisoners were not made available for publication in this report.

6. Location of Last Known Address

Addresses were initially coded to Local Government or Post-Code Area level within the reporting State, or to State level if within another Australian State. Separate categories were used for persons whose last known addresses were outside Australia, persons known to have no fixed address, and those whose address was not stated. Addresses within the reporting state were aggregated to Statistical Division level for tabulation in this report. For definitions of the boundaries of Statistical Divisions refer to the ABS publication '1981 Census of Population and Housing - Geographic Code List' (Catalogue Number 2141.0). Where the original data were Post-Codes the aggregation to Statistical Divisions was assisted by a special listing of Post-Codes to Statistical Divisions provided by the Australian Bureau of Statistics.

7. Marital Status at Receival

The actual, not necessarily legal, marital status was recorded, with defacto included in the married category.

8. Known Employment Status at Time of Arrest/Charge for Current Episode

The 'employed' category includes those self-employed; pensioners are included in 'other'. No data were available for prisoners in New South Wales.

9. Known Highest Level of Education

In all jurisdictions this item is coded 'as recorded'. It is not known to what extent the data include qualifications gained since receipt. No data were available for New South Wales. No distinction is made in Western Australia between levels less than three years secondary education. As a result prisoners with less than three years' secondary education are coded as having no formal education.

10. Date of Most Recent Receipt - The Current Episode

Following difficulties of interpretation and interstate comparison in the 1982 Census, a revised receipt definition was adopted for 1983 and repeated each year since. The date of receipt is the date most recently received into a gazetted prison in the current jurisdiction, regardless of legal status changes since that date and regardless of any authorised temporary leaves of absence. Thus a prisoner having escaped or been released on parole which was subsequently revoked is counted from the date of receipt after his period at large. The time between the date of receipt and the Census date is therefore referred to as the current episode, although for some prisoners their most serious offence and sentence information may relate to a period commencing prior to this episode.

11. Most Serious Offence/Charge

If the prisoner has been sentenced for one or more offences then the most serious offence is the offence for which he has received the longest sentence in this episode for a single count, regardless of the possible result of any appeals, and regardless of whether the sentence for that offence has actually expired at Census date. Where sentences are equal, the offence with the lowest DANCO code (see Figure 1) is selected. 'Life' followed by 'Governor's Pleasure' sentences are regarded as longer than any other. Only those offences for which sentences have been passed are counted.

Except in NSW, if the prisoner is unsentenced, whether convicted or not, the most serious offence is the charge which carries the longest statutory maximum penalty. Equal penalties are resolved in the same manner as before, using DANCO. In NSW the lowest DANCO code was selected whenever no sentence has been passed. If the prisoner has been convicted, then only those offences for which convictions have been recorded are counted. In Western Australia, sentences commenced prior to an escape or breach of parole are not counted, but the escape/breach is itself counted as an offence. An illustration of how complex the determination of most serious offence can be is shown below. This is a hypothetical (but not atypical) case.

The prisoner was received on remand 5/1/81 for Break, Enter and Stealing (3 counts) and Larceny of a Motor Vehicle. Sentenced on 28/1/81 to 2 years for B.E.S. and 1 year concurrent for L.M/V with non-parole period to expire 30/11/81. On 23/3/81 further sentenced to 4 years for Armed Robbery to commence from 23/3/81, new N.P.P. to expire 23/3/83. Released on parole on 23/3/83 he was revoked on 30/3/83 and returned to prison on 15/4/83. A further charge of L.M/V was heard on 25/4/83 and he was sentenced to 6 months from that date. He was re-paroled on 1/11/83. He was again revoked on 1/2/85 following arrest for attempted rape. A sentence of 3 years was passed on 20/3/85 to date from 1/2/85, N.P.P. to expire on 1/2/87.

Most Serious Offence would be recorded as Armed Robbery (4 years) in all jurisdictions except Western Australia, where the rape would be recorded since the 3 year sentence is longer than the period remaining to be served for the parole breaches (22 months).

12.Federal Offence/Charge

This question was included in the census for the first time in 1984. Federal Offences are offences against Commonwealth Legislation. They are most commonly offences related to prohibited importations such as illegal drugs, offences involving fraud or forgery, and offences against Commonwealth property or involving injury to Commonwealth officers. Persons imprisoned for such offences are generally held in the State or Territory of the sentencing court. Determining whether or not an offence is a federal offence can be quite difficult and prison records are frequently vague on this question, particularly while the court has not finalised the matter. For this reason the question was phrased 'is any offence known to be a federal offence?'. This may have resulted in some undercounting of federal prisoners, particularly remandees.

13.Level of Court

The rules adopted for coding the Level of Court were:

- i. Where an episode comprises orders/sentences of various levels of court, select the level of court appropriate to the most serious offence/charge.
- ii. Appeal Courts should be recorded only where courts have altered the length of sentence appropriate to the most serious offence/charge.
- iii. For prisoners not under sentence, select the level of court at which most recently remanded in custody. Prisoners held under Department of Immigration supervision are coded as 'other'.

14.State/Territory of Court of Sentence or Most Recent Remand in Custody

This question was included in the census for the first time in 1984. Legislation has been passed in recent years enabling prisoners sentenced or remanded in one jurisdiction to serve their period in custody in another jurisdiction, usually for reasons of proximity to family. Also, because of lack of suitable accommodation, sentenced prisoners from the A.C.T. have traditionally been housed in New South Wales prisons and some violent offenders from the Northern Territory have been housed in South Australia.

15.Legal Status of Prisoner

At Census date, the prisoner may be awaiting deportation, awaiting trial or verdict, convicted but awaiting sentence, detained as unfit to plead, under sentence, or awaiting the results of appeal. There are also several possibilities of dual status (e.g. under sentence for some offences and awaiting appeal results for others, under sentence and awaiting deportation, etc.) The counting rules were as follows:

i. If the prisoner is convicted of any offence then this takes precedence over any other offence(s) for which he may be on remand or held for deportation or as unfit to plead. Thus someone convicted on traffic charges but also awaiting trial for homicide is counted as a traffic offender. His status may be convicted awaiting sentence, under sentence no appeal current, or under sentence awaiting appeal, but cannot be unconvicted even though the charge of homicide is more serious.

ii. If the convicted prisoner has been sentenced for any offence then this takes precedence over any other offence(s) for which he may or may not be convicted. Thus someone sentenced for traffic offences and convicted, but not yet sentenced, for homicide is again counted as a traffic offender. His status must be under sentence no appeal current, or under sentence awaiting appeal.

iii. If the sentenced prisoner has appealed against ALL of his sentences then he is counted as under sentence awaiting determination of appeal. If any sentence is uncontested then this takes precedence over any offence(s) for which appeals are in progress. (Note: it is not certain that this distinction was well understood by all data coders, and it is possible that some prisoners have been coded 'under sentence awaiting appeal' when they should have been coded 'under sentence no appeal current'.)

16.Drug/Alcohol Involvement in Offences/Charges

This question has been included in the census for the first time in 1986. The issue of how many prison sentences can be directly or indirectly related to abuse of intoxicating substances has been raised in many forums, including parliamentary questions; and the dearth of real statistics has frustrated proper assessment of the problem. Only Victoria, Queensland and Northern Territory were able to set up routines for recording the information at receipt. The Northern Territory was in fact able to extend this to cover all prisoners held on the night of the Census. Other jurisdictions should be able to provide responses in future censuses. Readers are cautioned not to interpret the data presented here as either complete or representative of all jurisdictions. However they were thought worthy of publication, particularly those of the Northern Territory in view of that jurisdiction's divergently high imprisonment rates.

17.Aggregate Sentence

This item is the longest period that the person may be detained under sentence in the current episode. Charges pending which are likely to extend the current episode are ignored. Time served prior to any escape is included in all jurisdictions, and time served prior to a breach of parole is included in all jurisdictions except in Western Australia.

18.Type of Sentence (for Aggregate Sentence)

For prisoners with multiple sentences, the Type of Sentence is determined by the cumulative effect of all sentences imposed. 'Subject to Ministerial/Administrative Decision' includes unsentenced prisoners subject to deportation orders. 'Indefinite' refers to all sentences where a maximum term is specified and a minimum term or non-parole period is also set. The actual sentence to be served lies between these limits and is therefore described as indefinite.

19.Method of Calculation of Earliest Date of Release and Actual Expected Sentence

The period of imprisonment which a convicted prisoner actually serves depends upon the sentence(s) originally handed down, the system of remissions and the forms of parole available in the various jurisdictions. The Actual Expected Sentence is defined as the time elapsed between the Date of Receipt for this episode and the Earliest Date of Release (as defined below). No account has been taken of time served prior to any escape or other breach of conditions so care must be taken in interpreting tables involving these variables. The rules governing date of release are complex and differ from jurisdiction to jurisdiction. Calculations of Earliest Date of Release in the various jurisdictions were made as follows:

N.S.W.:

- i.If no Non-Parole Period has been set, or if a Non-Parole Period was set but the expiry date (less any applicable remission) has been passed, then the earliest date of release is the expiry date of the aggregate sentence less applicable remission.
- ii.Where a Non-Parole Period or Non-Probation Period has been set, then the earliest date of release is either the expiry date less any applicable remission or the expiry date of the aggregate sentence less applicable remission, whichever is earlier.

VIC.:

- Calculation is based on the 'effective' sentence minus one-third; the effective sentence being the minimum sentence, if one has been imposed, otherwise the fixed term. Time spent in detention prior to the commencement of the sentence counts toward the actual sentence and is subject to remissions at the normal rate - i.e. one-third off.

QLD:

- i.Sentences of less than 2 months - mandatory full-time date less any Special Remissions granted.
- ii.Sentences of 2 months and upward - mandatory full-time date less maximum remissions including Overtask Mark, Farm and Special Remissions plus any mandatory punishment penalties actually effective at Census date.
- iii.Sentences with parole recommendation - date from which parole recommendations become operative providing recommendation after Census date - otherwise ii. applies.
- iv.Sentences incorporating a bond - date from which parole recommendations become operative providing recommendation after Census date - otherwise ii. applies.
- v.Queen's Pleasure and Life prisoners - to be coded 888888.
- vi.Habitual criminals - calculate as for ii., then add two years.
- vii.Weekend detainees - mandatory full-time date.

W.A.:

- i.Where no minimum sentence is specified - use total effective sentence minus one-third (two thirds time date), less any special time off granted by the Director at Census date. (Note the change in the Prisons Act since the 1982 Prison Census.)
- ii.Where a minimum sentence has been specified - use minimum sentence less remission at the rate of three days per calendar month served. (i.e. the Earliest Eligibility Date (EED) as presently calculated). If this date is already passed and parole was denied use the next Review date or 2/3 time date whichever comes first.

S.A.:

- i.Sentences under 3 months - aggregate sentence less any special time off granted by the Director at Census date.
- ii.Sentence 3 months or more - aggregate sentence less one-third remission and less any special time off granted by the Director at Census date.

TAS:

- Calculation is based on the totality of sentence liable to be served, minus one-third, but shall not operate so as to reduce the sentence below three months.

N.T.:

- Non-parole expiry date, release on remission date, or suspended sentence release date as applicable.

A.C.T.: Not applicable - no prisoners under sentence.

20. Current Security Classification of Prisoner

The various jurisdictions use differing rules for the classification of prisoners, to the extent that the terms Maximum, Medium and Minimum may have different meanings from jurisdiction to jurisdiction. They are, however, at least broadly comparable - prisoners normally spend the early part of their term in maximum security, and move through medium to minimum security as they serve their sentence. Exceptions to this process normally include violent prisoners and former escapees. Trends in the statistics are an important management tool with implications for both prison manpower and accommodation requirements.

21. Comparisons with other Prison Statistics

It is important to realise that these statistics relate only to a point in time, that is, midnight on 30 June 1986. Since prison populations tend to be in a state of continual flux with new arrivals and departures being daily occurrences, many published figures are of the 'daily average' type. Some comparisons can be seen in the figures published monthly by the Australian Institute of Criminology, from data supplied by the State corrections departments, under the title Australian Prison Trends.

The precise time of the census is of particular importance in understanding apparent discrepancies between Prison Census figures and those resulting from other types of counts. The Australian Prison Trends publications differ also in the counting rules adopted with respect to prisoners serving sentences outside the prison walls, for example on various forms of work release, and record prisoners by sentencing jurisdiction rather than actual location. Thus, Australian Prison Trends No.122 records that 60 of the Australian Capital Territory prisoners were held in New South Wales prisons. In most tabulations in this publication they would be recorded by their actual location.

Finally, because of the different counting rules, disparities may even be found between figures in this publication and those produced by the corrections departments from the same data. Extreme care should be taken to ensure that like is being compared with like.

22. Flow Statistics and Monthly Averages

Tables A and B compiled from Australian Prisons Trends data, show the monthly trends in prisoner numbers since the previous census:

Even though the counting rules used in Tables A and B differ from those used in the census, these tables help to explain the nature of the changes that have taken place between the censuses of June 1985 and 1986. Prisoner numbers overall at 30 June 1986 were six per cent higher than the previous year, reflecting a halving of the growth rate compared with 1984-85. Jurisdictions whose census counts fell between June 1984 and 1985 (Western Australia, Tasmania and the A.C.T.) recovered or surpassed their 1984 figures in 1986. South Australia and New South Wales showed modest increases in 1985-86 after large rises the previous year. The Northern Territory again showed a significant rise (28.4 per cent) while Queensland also rose (up 9.4 per cent).

Table A shows the numbers of convicted persons received into gazetted prisons during 1985-86. It is difficult to identify very clear trends in the table, but it is of interest to note that the total number of receptions for 1985-86 was slightly lower than the equivalent figure for the previous year. This clearly suggests that the overall increase in numbers noted above is due more to an increase in the duration of imprisonment than it is to the numbers of persons sentenced to imprisonment. This is confirmed by a comparison of Aggregate Sentences (Table 29A) in this Report and those of the previous year: the proportion serving sentences of under one year fell from 27.7% to 23.9%, those serving one and under five years remained the same (1985-35.9, 1986-35.3), while those serving five years or more increased from 36.3% to 40.3% of the total.

* Ratios of prisoners per 100,000 total population by most serious offence/charge..

THE STRUCTURE OF THE REPORT

The statistics contained in this report are presented in three parts:

Part A: Summary Tables

The tables in this part show the basic characteristics of prisoners, their offences and sentences, and enable comparisons by sex and jurisdiction. Where appropriate, tables of percentages, rates per 100,000 relevant population, and graphic representations have been included.

Part B: Crosstabulations by Most Serious Offence - Australia

In these tables, aggregated figures for all jurisdictions combined are presented, showing the relevant characteristics of offenders and sentences and enabling comparisons between the various offence types.

Part C: Interstate Comparisons of Legal Status and Sentence Lengths

The Legal Status of Offender, the Sentence for Most Serious Offence, the Aggregate Sentence and the Expected Duration of Imprisonment (calculated as the time between Date of Recelval and Earliest Date of Release less any time at large due to escape or parole) are shown classified by Most Serious Offence for each jurisdiction. These tables should facilitate inter-jurisdictional comparison of overall sentencing practices for the various offence types and will be useful in evaluating differences in legislation, and parole rules.

ACCESS TO ADDITIONAL TABULATIONS

The Ministers have determined that, because of the confidential nature of some of the information contained in the data files, requests for access to data or for the production of additional cross-tabulations, beyond those published in this report, will only be acceded to under the following conditions:

- 1. The only persons who will have access to individual records will be officials of the contributing government departments (who will only have access to their own data) and appropriate staff of the Australian Institute of Criminology and Australian Bureau of Statistics (who will not release individual records under any circumstances).
- 2. Each State and Territory is free to publish its own data in any form at any time at the discretion of the relevant minister.
- 3. Where necessary, the Australian Institute of Criminology will provide aggregate cross-tabulations of State and Territory data as requested by State and Territory authorities, such data pertaining only to that State or Territory.
- 4. All requests for additional data, except as provided for in 3. above, will be submitted to the Correctional Administrators for approval. In no circumstances will the confidentiality of individual records be breached, and copies of additional computer outputs resulting from such requests will be forwarded to the relevant State or Territory authorities.

Non-governmental researchers wishing to gain access to additional tabulations should therefore initially contact correctional administrator(s) in the jurisdiction(s) concerned or, if national aggregate data is required, the Director, Australian Institute of Criminology, for submission to the Correctional Administrators' Conference.

Note: These items were included for the first time in the 1986 National Prison Census because of the apparent importance of the topic, and the lack of existing information on how many prison terms are related to abuses of substances such as alcohol, drugs or petrol. Only Queensland and the Northern Territory were then able to obtain specific information on the full range of the questions asked. In Victoria, the question relating to the influence of alcohol was answered only by persons received into prison during the year 1985-86 with sentences of at least six months. Readers are cautioned not to interpret the data in this table as necessarily complete or representative of all jurisdictions in Australia. A more comprehensive picture should emerge next year when other jurisdictions should be able to provide information in this area. The figures in this table do indicate, however, a significant level of substance-abuse involvement in offences for which persons are imprisoned.
