# Introduction

The Australian Institute of Criminology has established a national clearinghouse of criminological information to act as a central agency for the collection, storage, exchange and dissemination of bibliographical data on Australian and Australian-related criminological material.

This information is stored on computer and forms the data base of CINCH (Computerised Information from National Criminological Holdings), the Institute's computerised bibliographic service which provides rapid and comprehensive retrospective searches.

The *Information Bulletin of Australian Criminology* is published quarterly and is an integral part of this system, publishing in its 'Recent Publications' and 'Current and Recently Completed Research' sections all the new material which continuously updates the CINCH data base. It also contains information regarding past and forthcoming seminars in Australia, bibliographical activities of the J.V. Barry Memorial Library and generally aims to encourage a greater interchange of information between all persons interested in Australian criminology.

The success of the Information Bulletin depends to a large degree on material contributed to it by its readers, and persons who would like a statement of their research to appear or wish to publicise conferences or seminars are invited to complete the appropriate forms supplied with each issue and return them to the address below.

Readers will appreciate that the information contained in the Information Bulletin can only be as accurate and reliable as its source.

The Australian Institute of Criminology hopes that the services provided by CINCH and this Information Bulletin prove valuable to those interested in criminology and looks forward to the continued interest and assistance of its readers.
